

Public Dialogue – Potential Grant Funded Projects for Gridley Parks and Recreation.

We are currently in the process of applying for a State of California Proposition 68 Grant Funding to rehabilitate Vierra Park and potentially add to other City of Gridley Parks. Some of you may be familiar with this Vierra Park and its recent upgrades. This following list of possibilities to be funded by State of California Grants will be discussed at brain storming public meetings on October 15th and 18th.

Vierra Park is in need of updating. We want to get community member feedback regarding potential improvements at both Vierra Park, as well as other potential City Park areas. Additionally, we may be using “Survey Monkey” to gather additional input. After we gather information from our valued community members, we will be adding it to the City of Gridley’s Proposition 68 Grant Application. During the meetings we will be taking comments on the following initial brain storming list, in addition to any other ideas the public may have:
